

KELVA Pumps

VP6, VP12, VP18, VP26

Improved Quality

– With the Classic Kelva Pump

- Can handle anything from water to sludge in the low flow range
- Excellent in situations where portable and submersible equipment is needed
- Bayonet opening as option for faster dismantling
- Air operated and thus explosion proof

Kelva Classic versatile VP-Pump is available in a number of sizes. The VP6 is our smallest VP-Pump, the VP12 our largest.

Bayonet opening for faster opening and cleaning, is available for some models.

Diaphragms and O-rings are available in several different materials, depending on the liquid.
